

SLINGSHOT™ FIELD HUB

Technical Data Sheet

1.0

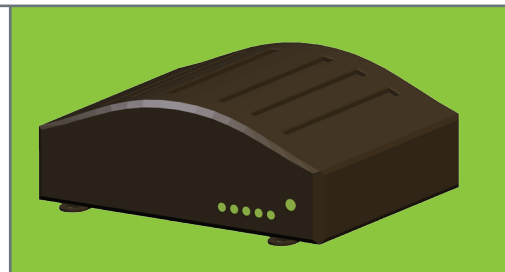

SLINGSHOT FIELD HUB> SPECIFICATIONS

The core of the Slingshot™ experience is the Slingshot Field Hub. A small device that fits neatly into the cab of your vehicle, the hub connects your precision ag hardware to the most advanced RTK correction signal available. It also connects your operator, managers and Slingshot support to each other via the Internet and puts a complete web experience on your Raven field computer.

With an annual online subscription, the hub delivers Slingshot's advanced RTK correction signals and high-speed Internet to your field computer via mobile cell phone networks. It's the same wireless connectivity technology that powers smart phones and PDAs. Even if you work in a region you think doesn't have cell phone coverage, you might be surprised: Slingshot's industrial-grade hardware, software configuration and high-end antennas can acquire signals with higher performance than your cell phone.

The hub's compatibility with all cell phone networks in North America means an enormous new region can use Slingshot features and services. Plus, the hub works with CORS networks and is even compatible with non-Raven guidance systems and field computers.

- > Sends/receives data via wireless cell phone networks
- > GSM + CDMA network compatibility delivers Slingshot RTK + Slingshot Online services to all regions of North America with cell phone service
- > Zero line-of-sight limitations: signal acquisition regardless of hills, trees, buildings or other obstructions
- > Dual industrial-grade antennas acquire signals in remote and uneven terrain
- > Compatible with CORS networks
- > Compatible with non-Raven guidance/steering systems and field computers
- > No need to change existing hardware set-up to leverage RTK signal connectivity
- > No need to change the way you currently manage data
- > The end of thumb drives and lost data: transfers work orders, prescription maps, other data in real time via the Internet to and from your secure Slingshot Online account
- > The end of down-time, work stoppage and user error: connects live Slingshot support personnel in North America to the cab, no matter how remote; support personnel can diagnose a problem, control the field hub or Raven field computer, fix or explain technical issues in real time
- > Three-year warranty

Size: 166 x 107 x 56 mm (6.5" x 4.2" x 2.2")
Weight: 498g (1.1 lb)
