SLINGSHOT™ ONLINE

Technical Data Sheet 1.0

SLINGSHOT ONLINE> SPECIFICATIONS

Thanks to Slingshot™ Online, the Slingshot experience moves your entire operation to a new level of performance. Precision Ag finally has the power of the Internet and a host of new ways to achieve perfection in the field and in the office. Through a secure online account and real-time Internet connectivity, Slingshot delivers powerful new services you won't find anywhere else the industry.

Track vehicle locations, make spur-of-the-moment changes to work orders and collect data from your entire fleet in real time. With your vehicles remotely connected to the Internet (through the Slingshot Field Hub), you can transfer data to and from your operators while they're on the job, without any work stoppage. No more thumb drives, lost data or downtime from changes to work orders or prescription maps.

Slingshot Online stores all field and application data in a secure database you can access from any laptop, desktop or mobile computer anywhere in the world.

Notes

- Track vehicle positions in the field
- Transfer work orders, prescription maps, other data in real time via the Internet to and from your secure Slingshot Online account: say goodbye to thumb drives and lost data
- Automates and cleans data in a simple, consistent, coherent format, regardless of the operating system of your current field computer
- No need to change the way you currently manage data
- Simple, easy-to-understand data tracking and analysis for every pass, every acre, every client
- The end of down-time, work stoppage and user error: connects live Slingshot support personnel in North America to the cab, no matter how remote; support personnel can diagnose a problem, control the field hub or Raven field computer, fix or explain technical issues is real time
- Control profiles and setting for all your Raven hardware without ever stepping foot in a cab
